

Michigan

Michigan General Comments

- The Army intends to transform its active and reserve facilities in the state to gain a more efficient and effective organization to support Army requirements now and into the future by:
 - Transforming Detroit Arsenal into a multi-functional installation that serves as the home to a Life Cycle Management Command. Consolidating functions at Detroit reflect the Army's determination to transform its Materiel and Logistics base to keep pace with transformation of the combat forces.
 - Creating an installation portfolio that can support and sustain its new force structure, and missions as the Army transforms to an expeditionary force.
 - Creating a multi-functional reserve facility that will enhance unit readiness, increase training opportunities, and generate operational efficiencies.

Reserve Component

Gains:

- Build 1 Armed Forces Reserve Center on Ft Custer Reserve Training Center

Losses:

- Close 1 Army Reserve Center
- Close 1 Army Reserve Area Maintenance Support Activity
